Overview

Gear up your store's login/register process. Give your customer an easy way to login and register without leaving current page. It facilitates custom popup window with design settings.

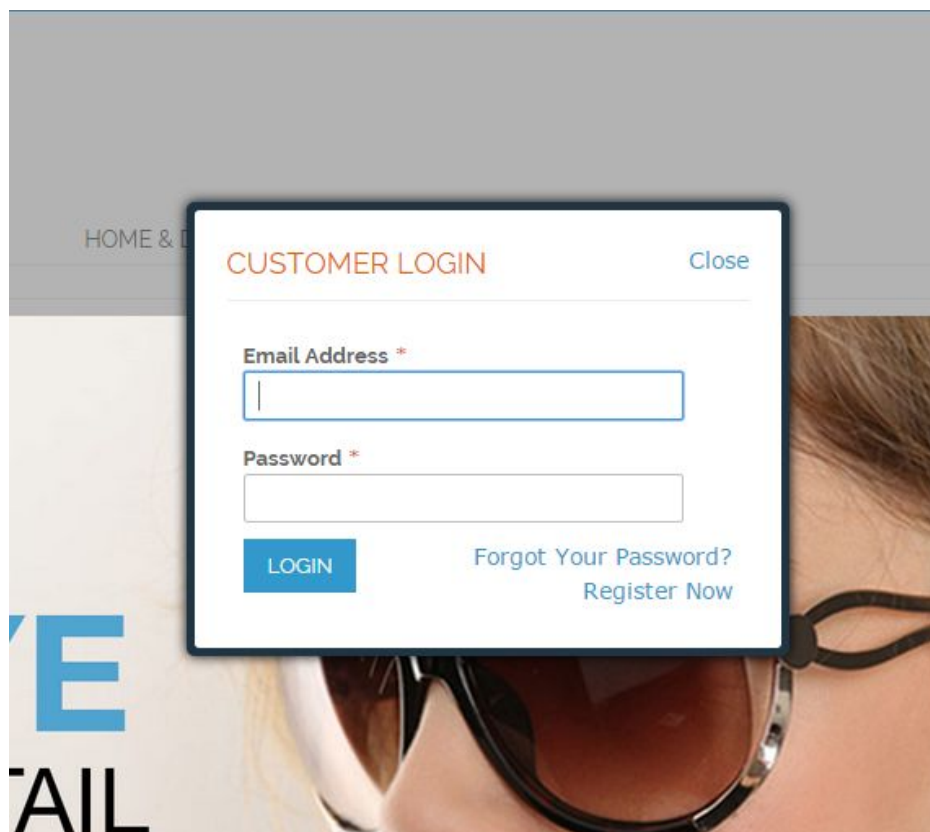

Why Ajax login/register?

- ❑ Minimize login/register time
- ❑ Make these processes user friendly and convenient

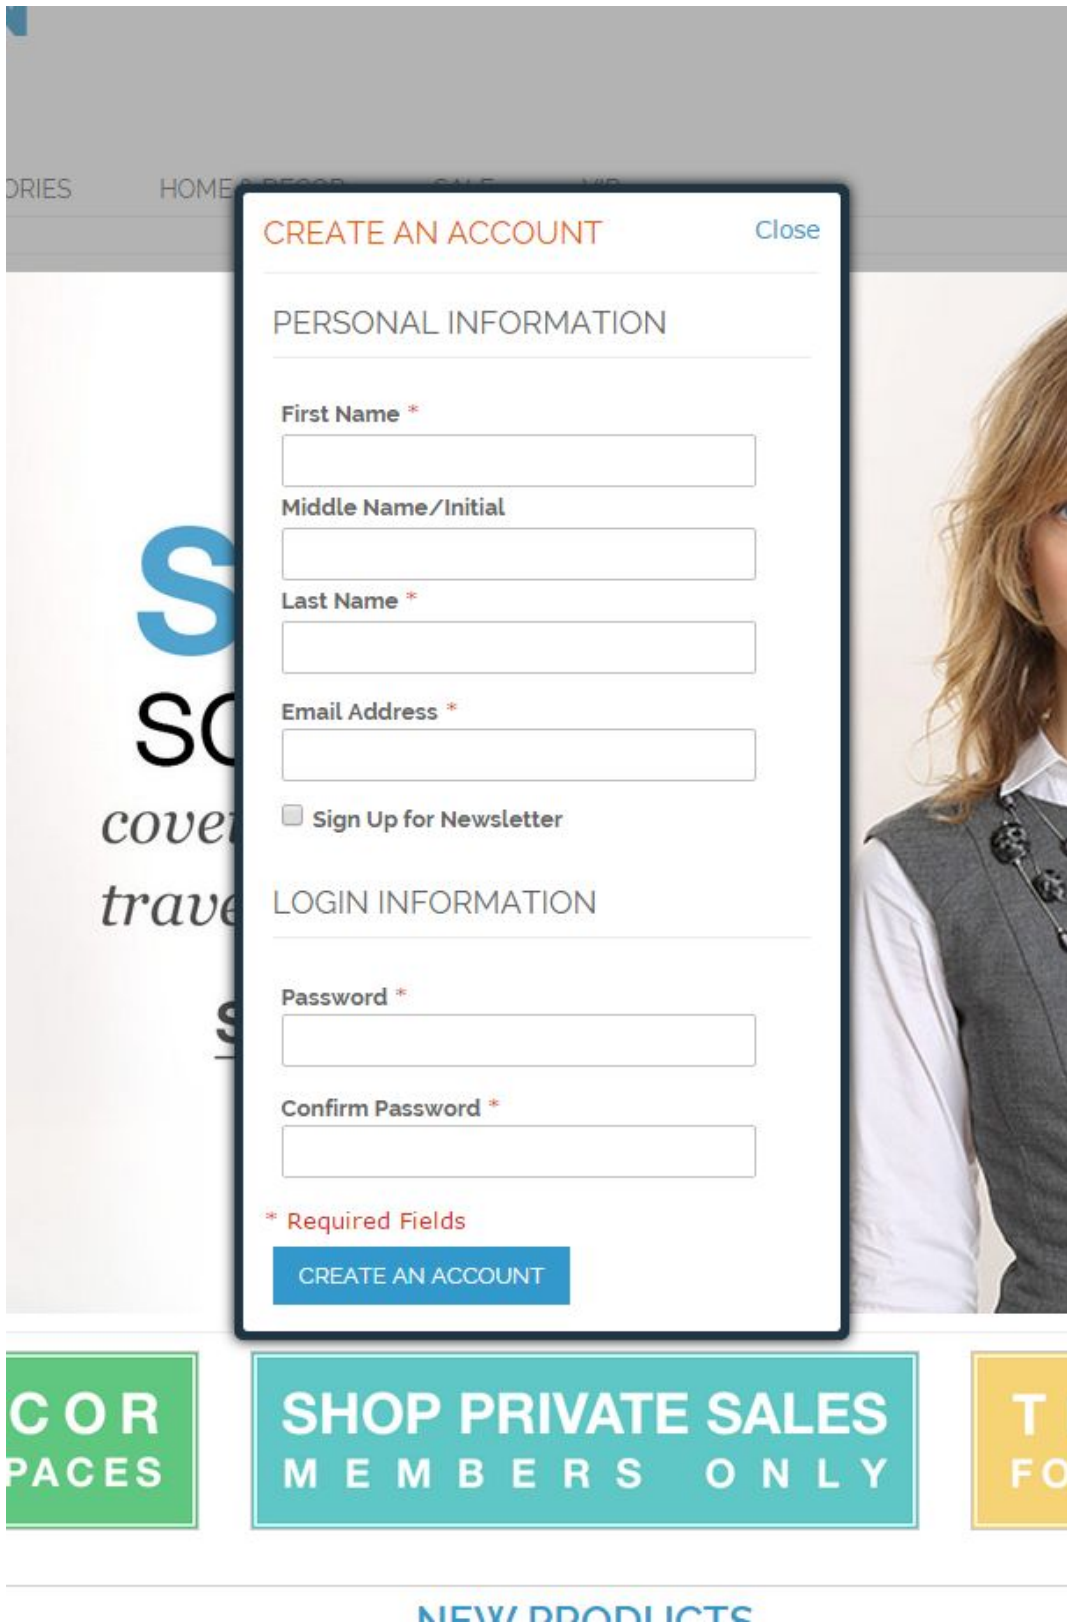

How it works?

Each form displays in popup window.

Login popup Screen:

Register popup Screen:

The image shows a registration popup form titled "CREATE AN ACCOUNT" with a "Close" button in the top right corner. The form is divided into two main sections: "PERSONAL INFORMATION" and "LOGIN INFORMATION".

PERSONAL INFORMATION

- First Name ***: A text input field.
- Middle Name/Initial**: A text input field.
- Last Name ***: A text input field.
- Email Address ***: A text input field.
- Sign Up for Newsletter**: A checkbox option.

LOGIN INFORMATION

- Password ***: A text input field.
- Confirm Password ***: A text input field.

*** Required Fields**

CREATE AN ACCOUNT: A blue button at the bottom of the form.

The background of the website shows a navigation menu with "DRIES", "HOME", "PERSONAL", "SALES", and "MY". Below the popup, there are three promotional buttons: "CORPORATE SPACES" (green), "SHOP PRIVATE SALES MEMBERS ONLY" (teal), and "THE FUTURE OF" (yellow). At the bottom, there is a "NEW PRODUCTS" link.

Forgot password Screen:

Features

- 1. Multi store configuration with single installation:** Extension can be configured for each and every store created in your Magento installation.
- 2. User friendly :** It offers user friendly interface which is easy and fast accessible.
- 3. Reduce reloading time :** As each form screen opens in form of popup window and there is no redirection or reload time of page.
- 4. Design customization:** Extension let you design the popup screens from backend. There is options to add border, overlay mask and colors.
- 5. Activate Login and Register separately:** Both windows can be enable and disable independently with affecting each other.

Configuration

Extension configuration is required to make it ready to function and set-up according to your requirements. Here is step by step guide to configure it.

Store > Configuration > Extension Hut > Ajax Login/Register

1. **Activate ajax login** enables the login screen to display in popup.
2. **Activate ajax register** let you enable the register screen to display in popup.
3. **Show shadow border** outside the each form. This can be enable or disable to show over popup screens.
4. **Show overlay mask** helps to add background faded screen when popup window gets open.
5. **Popup background color** can also be defined in hexa color code.
