Features	3
Configuration	4

Overview

Download Time limit facilitate admin to set time for download for each product after purchase. After setting limit user would have limited time to download the products.

As the product reach to the download time limit it will automatically get expired and customer would not be able download.

It doesn't affect the existing functionality for number of download limits. After installation download time for product along with number of download for customers can be set all together.

Why Download Time Limit?

- Set time limit to download sold products.
- No of downloads for specified time.

Features

- 1. Global configuration:** Global extension configuration for each and every store created in your Magento installation.
- 2. Max product limit for each product:** Each product would have its own maximum download limit.
- 3. Max time limit in days:** Download time limit for each product in days. Product would be downloadable within max time after purchase.

Configuration

Extension configuration is required to make it ready to function and set-up according to your requirements. Here is step by step guide to configure it.

Store > Configuration > Extension Hut > Download Products limit

General Settings

1. **Enable Download Time Limit** extension to start its operational mode.
2. **Maximum Number of Downloads from Products** provide an option to set download limit in number for each and every product of the store. Set it to "No" if you want to if you want default global limit.
3. **Maximum Time for Downloads** to defined a time limit in days, in between the product would be available to download in customers account.
