## Overview

---

Category custom URL extension provides the ability for store owners to add the custom links in the top navigation menu. Sometimes, store owners need to add the generic pages (like, Contact Us, About Us etc.) in the navigation menu and this extension is perfect to do this. This extension will add a new field in the admin category screen where the custom links can be added to the particular category.

## Features

---

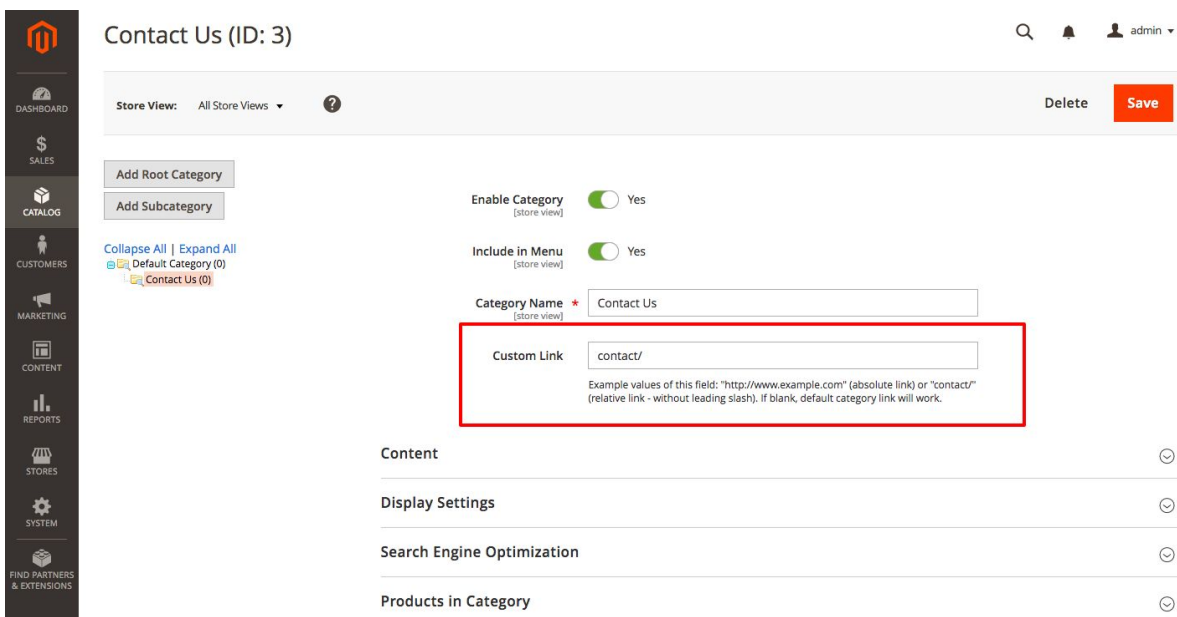

1. Add custom links to the top navigation menu items.
2. Separate field for each category to add the custom link.
3. Store owner will have the ability to add custom menu items other than category links in the top navigation.
4. Ability to accept absolute URL and relative URL.

## Configuration

---

Extension configuration is required to make it ready to function and set-up according to your requirements. Here is step by step guide to configure it.

**Options to add custom link for category:** Catalog > Categories > Category add/edit window

The screenshot shows the 'Contact Us (ID: 3)' category configuration page. The page has a sidebar on the left with navigation options: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area includes a 'Store View' dropdown set to 'All Store Views', 'Delete' and 'Save' buttons, and 'Add Root Category' and 'Add Subcategory' buttons. The 'Enable Category' and 'Include in Menu' options are both checked. The 'Category Name' field contains 'Contact Us'. The 'Custom Link' field is highlighted with a red box and contains 'contact/'. Below the form are sections for Content, Display Settings, Search Engine Optimization, and Products in Category, each with a collapse/expand icon.
