Overview

Static block Scheduler is an amazing product that helps to control cms block visibility on your store. It provides you an option to plan which cms block need to be visible or hide from store for specific date and time. You can plan for special occasions or promotional offers in advance with effective way. It save your time and make you free from the hectic routine to manually enable or disable cms blocks on the store.

Why Static Block Scheduler?

- ❑ Make static blocks available on your store for special occasion and offers.
- ❑ Schedule each static block individually.

Features

- 1. Separate schedule option for every block:** Each cms block has its own schedule option in block add/edit window to make it available to shop or hide from shop on store front.
- 2. Date and Time option:** Cms blocks can be scheduled on specific time for a particular day for both enable and disable block.

Configuration

Extension configuration is required to make it ready to function and set-up according to your requirements. Here is step by step guide to configure it.

Options to schedule cms blocks in backend

Content > Blocks > Block add/edit window

The screenshot shows the 'New Block' configuration page. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main content area is titled 'New Block' and includes a search icon, a notification bell, and a user profile 'admin'. Below the title are buttons for 'Back', 'Reset', 'Save and Continue Edit', and 'Save Block'. The configuration fields include: 'Enable Block' (checked 'Yes'), 'Block Title *' (text input), 'Active From' (date picker, highlighted with a red box), 'Active Till' (date picker, highlighted with a red box), 'Identifier *' (text input), and 'Store View *' (dropdown menu with options: All Store Views, Main Website, Main Website Store, Default Store View).

Date picker to set the scheduling in yyyy-MM-dd HH:mm:ss format

This screenshot shows the same 'New Block' configuration page, but with a date and time picker open over the 'Active From' field. The date picker is highlighted with a red box. It shows the month 'May' and the year '2018'. The calendar grid displays dates from 29 to 31. Below the calendar, there are time selection controls: 'Time: 18:02:57', 'Hour' (slider), 'Minute' (slider), and 'Second' (slider). The 'Go Today' and 'Close' buttons are also visible. The rest of the page configuration remains the same as in the previous screenshot.
