Overview

Transactional Email Promotions helps to update your customers about offers, related products and upcoming events with transactional email. This extension allows store owner to easily create custom email content with both static and dynamic information and provides an effective way of email content marketing to deliver information to your customers without any extra email. With the help of email content marketing you can enhance your product up selling ability and let the customers know what updates and best offers you have for them.

The basic idea behind this technique is to keep the customers updated without annoying them. Transactional Email Promotions uses only transactional emails to send information. This can be considered as a healthy communication channel between customers and your company.

List of customer and guest emails for promotion

- Customer sale order emails
- Sale order comment emails
- Sale invoice emails
- Sale credit memo emails
- Sale shipment emails
- Sale shipment comment

Why Transactional Email Promotion?

Use Cases

We can use this extension with many different ways or as per our requirement. Here are some possible cases:

New or upcoming products campaigning:

Let your customer know about your new product launch on your store or the future products which are yet to come.

Attach informative content about your company and services:

Create static block, write services you provide, about company or required information that you want to send to your customers and attach this to different emails.

Tell your customer about offers and events:

Spread running offers and event through your customers that can help to make your potential customer into buyer.

Product upselling:

This is also helpful for products up-selling. It also have an option to select and send the up-selling products, related products in mail that can boost the sale.
